

The Gryphon Diamond Band Saw Model C-40

From the company that invented the glass cutting bandsaw in 1976 comes the latest in a long line of quality diamond tools. Our famous Model C bandsaw has dozens of new improvements.

Pick up your production speed

- You cut faster - the blade travels at 40 miles per hour - nearly twice as fast as our previous Model C
- Improved tension adjustment gives you an even quicker and easier setup
- New upper blade guide provides increased control while cutting

Cut your out-of-pocket expense

- New saw and wheel design reduces basic saw maintenance to near zero
- You cut more accurately and have less waste because tighter blade tensioning allows more precise cutting

Gryphon Diamond Band Saw Model C-40

The Gryphon Diamond Bandsaw is the ideal tool for your difficult projects. It cuts as easily through heavily rippled glass as it does through the smoothest window glass. Those impossible cuts are made easy - simply guide the glass, and the saw does the rest. With our new high-speed motor, you will breeze through your projects at a surprisingly fast pace. Ask your dealer for a demonstration.
